

PRL Complete Director's Follow Focus Kit

SKU: PRL-FF-KIT
 EAN-13: 8718591675751

Description

The PRL follow focus is an essential but affordable piece of equipment for the professional focus puller, DoP or cinematographer. Thanks to all the included accessories you're well prepared to get precise focus during your film shoot or video production.

The PRL Follow Focus snaps onto any 15mm rod system so you don't have to remove other rod-mounted accessories. Thanks to the clamping knob, it allows you to fasten onto the rods without the use of any tools. It also features horizontal adjustment that allows it to work with different-diameter lenses, making this suitable for use with prime and zoom lenses.

Featuring red and blue aluminium focus rings with built-in A/B hard stops, this follow focus unit makes pulling focus easy. We've added two extra hard stop screws in case you lose one while you're on the shoot. The two spares are parked in the appropriate screw holes under the M0.8 pitch/drive gear. This gear can be mounted in front or rear position.

Also included are a speed crank for faster and more extended focus pulls and a short whip for pulling focus smoothly without shaking the camera. The FF comes with two magnetic marker rings and four flexible gear rings.
